Change Control Form	CCF No: G17-CCF-03

Problem reported by: Chris Price   Date: 9/03/2017

Item Name: Test Specification   Config Ref: SE.G17.TS

Version to change: 1.0   Group: 17

Problem Description: No config ref. Copyright 2016. "one the game" should be "once the game" Test 1: Not repeatable. Input "ASDFGHJKLZXCVBNM123456789" as name would be repeatable. Same for test 2. Test 3: Tell me what all 4 legal names should be. In fact, test 4 is a repeatable version of test 3. You could do it first and then say "Test 4: repeat test 3 but with all names in capital letters". Similarly test 5, say "Using the same names..." Ditto 6, 7. Test 16 - this is another "when a player gets a card which says take treasure type situation. You can't just say "Let player 1 take a diamond" - not part of the game. Best bet is to say keep taking chance cards until a player has a card that lets them take a treasure.... Ditto for all your type of treasure tests. Test 25 - not a system test. You can note it should be checked in the unit tests - think what other tests this is also true for. Test 32 - I wasn't proposing to implement safety zone.
